

Intimate area changes as we age

- Hormonal decline accelerates the sagging of the whole body, including the skin of the vulva
- Skin color may naturally darken particularly after childbirth and during puberty due to hormonal changes and natural frictions
- Common concerns in vulvar area rise specially in its "sagging skin", "size" and "tone"

THE DEEP SYNERGY BOOSTER

ULTRAFORMER ULTRAITIMI

FOR YOUR INNER CONFIDENCE

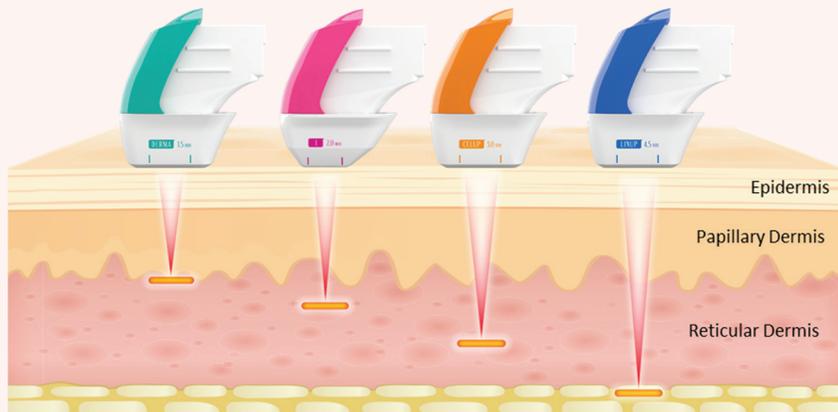

Enhanced Intimate beautification care with **ULTRAIMIMI** treatment

What is **ULTRAIMIMI** treatment?

When **ULTRAIMIMI gel** is combined with **ULTRAFORMER MPT**, it stimulates the dermis in the vulva area, promoting rejuvenation. This treatment enhances skin tone, elasticity, and firmness of stretched tissues, while also helping to restore the skin's original color.

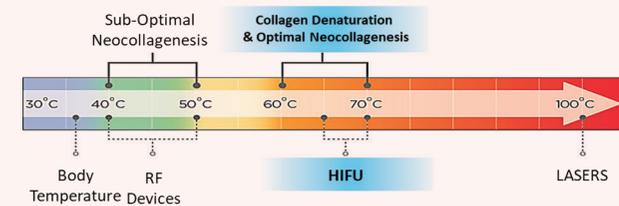

Benefit of **ULTRAIMIMI** treatment

Unlike other treatment like CO₂, Er:YAG laser treatment, **ULTRAIMIMI** specifically targets the dermis without affecting the epidermis, resulting in quicker recovery and a lower risk of infection. Patients experience a smoother recovery process with less discomfort and easier aftercare.

Mechanism of **ULTRAIMIMI** treatment

HIFU, which stands for High Intensity Focused Ultrasound, using a ultrasonic energy is used to form a Thermal Coagulation Point(TCP) at a temperature of 60–70°C at a specific depth of the skin layer, through cell necrosis and collagen regeneration, thereby inducing lifting and tightening effects.

ULTRAFORMER MPT
Skin Lightening / Improved Elasticity

+

ULTRAIMIMI
Skin Lightening / Moisturizing / Soothing / Anti-inflammatory

ULTRAFORMER MPT features specialized MPT treatment modes designed for skin lifting and rejuvenation. The MP mode delivers energy through wide heating, seamlessly targeting the TCP zone and forming 417 TCPs in a single shot.

Clinical cases of **ULTRAIMIMI** with combined treatment

"Patients are looking for treatments that do not require downtime."

"With Ultraformer III there is no excision of the treatment area, so the procedure itself is more comfortable."
